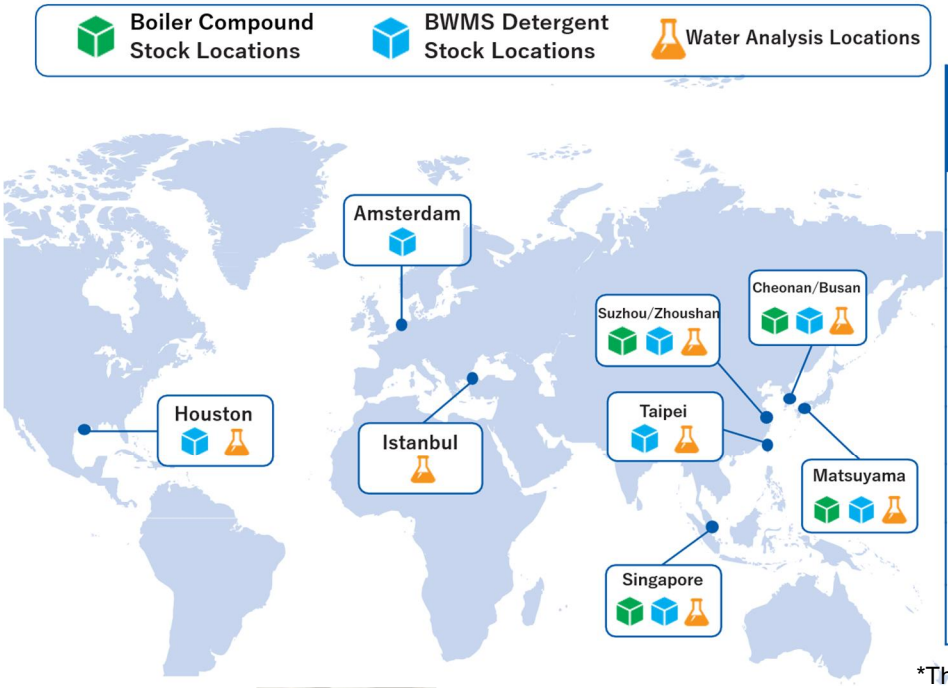
Strengthening the Global Supply Network for Genuine Marine Boiler Compound

To ensure the safe and reliable operation of vessels, it is essential to maintain boilers and BWMS in optimal condition.
In addition to supplying genuine marine boiler compound and BWMS detergent, we provide a one-stop service covering water analysis and maintenance. Through these services, we help reduce our customers' maintenance workload and support the long-term stable operation of their equipment.
By establishing new supply hubs in China and South Korea, we have enhanced our global supply network, enabling the faster and more reliable delivery of genuine marine boiler compound.

■Boiler Compound Stock Locations
Matsuyama / Singapore / Suzhou (NEW) / Cheonan (NEW)

■BWMS Detergent Stock Locations
Matsuyama / Taipei / Houston / Amsterdam / Busan (NEW) / Singapore (NEW) / Zhoushan (NEW)

■Global Marine Service Network



Locations	Boiler Compound Stock Locations	BWMS Detergent Stock Locations	Water Analysis Locations
Amsterdam	–	○	–
