## Precheck sheet will help you understand the condition of MIURA products!

Do you have any of the following problems in your daily equipment maintenance?

- I want to know the current condition of the equipment correctly.
- I want to select the necessary parts for docking.
- I want to diagnose if the current state of the equipment is normal.
- I do not know what to check to prevent troubles from occurring.

To respond to these requests, we have created a precheck sheet for the crews.

This sheet is a list of items that should be checked, selected by our engineers.

Please fill out the necessary information, attach photographs, and send it to our engineer or to our representative e-mail address below. The engineer will reply to you with the results of the diagnosis.

The sheet is in Excel format, so you can use it on your computer.

Target products are as follows.

Product	Model
Auxiliary boiler	HB-T, VWH, HB-025 to 06
Composite boiler	GK
Incinerator	BGW-N
Thermal oil heater	HTB
Ballast water management system	HK

Please contact us directly if you have any questions about equipment that is not covered.

Representative Email address: [hakuyo\\_mka@miuraz.co.jp](mailto:hakuyo_mka@miuraz.co.jp)

If you have any questions, please contact the nearest MIURA office.
