Issued June 27, 2016

Completion of the installation and commissioning test of MIURA's HK-450 ballast water management system on a domestically owned bulk carrier

MIURA CO.,LTD. (Head Office: Matsuyama, Ehime, President & CEO: Daisuke Miyauchi, hereinafter MIURA), Japan's leading manufacturer of small once-through boilers, has announced the completion of the installation and commissioning test of its HK ballast water management system on the bulk carrier owned by a domestic shipowner.

In June 2016, MIURA CO.,LTD. completed the installation of HK-450. The installation and commissioning test of the vessel were conducted as the first vessel at the new No.7 dock in Sanwa Dock Co.,Ltd. (in Innoshima, Hiroshima Prefecture), timed to coincide with periodical inspection of the vessel.

MIURA will continue to accumulate results in engineering, installation support, and commissioning test for various ship types, regarding the retrofitting of the ballast water management system HK. We will also respond to the requests of customers, contributing to the preservation of the marine environment around the world.

Vessel : Built by Imabari Shipbuilding Co., Ltd.

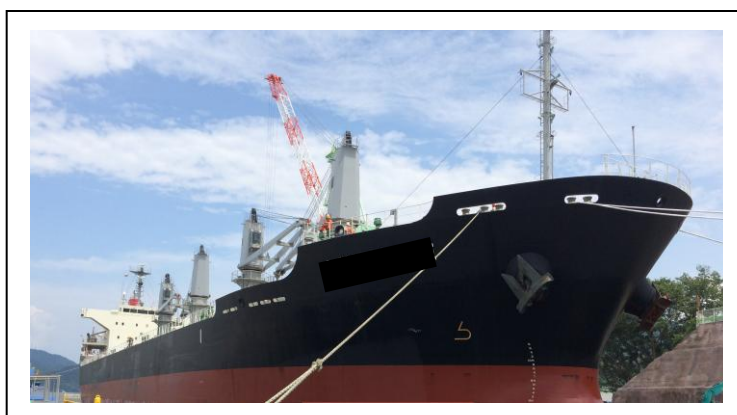

Vessel type: 28,000 DWT bulk carrier

Equipment installed: HK-450 (450 m³/h) Filter + UV reactor system

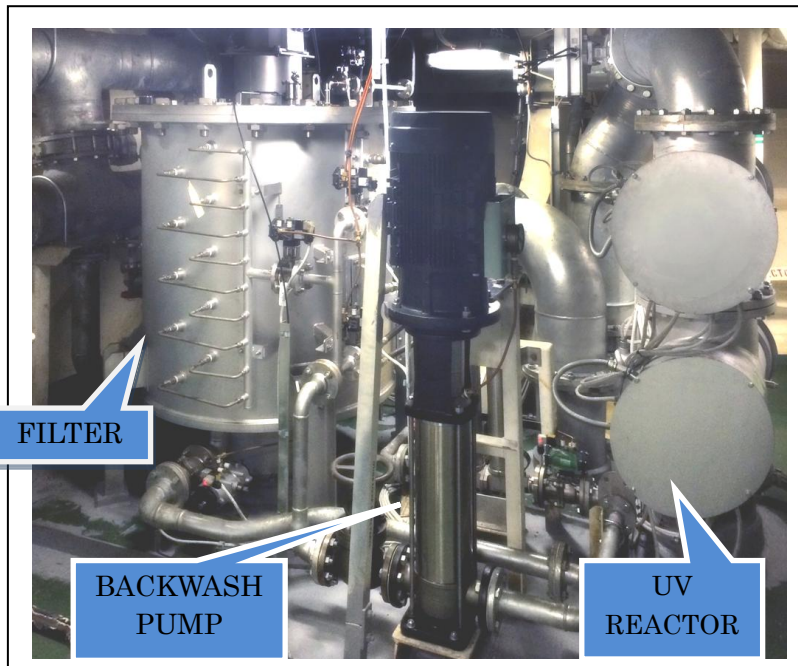

Dock: New No.7 dock, Sanwa Dock Co.,Ltd.

*1 Retrofit: Installation of equipment on a vessel already in service
