Notification of new web content dedicated to the ballast water management system HK

MIURA CO.,LTD. (Head Office: Matsuyama, Ehime, President & CEO: Daisuke Miyauchi, hereinafter MIURA), Japan's leading manufacturer of small once-through boilers, has launched new web content dedicated to the ship ballast water management system HK on the MIURA website.

The web content dedicated to HK explains the merits of the MIURA ballast water management system HK. It has been published so that it can be viewed by customers around the world who are considering the installation of the system, so that those customers can better understand the system.

The message to be communicated is "Less is More" Making it simple for you. The site introduces seven key points that mean that performing certain tasks becomes unnecessary, to thoroughly eliminate various tasks and burdens for shipowners, managers, crew and management companies.

The site will also communicate timely updates on the progress of USCG TA^{*1} acquisition and retrofit information.

The web content offers an easy to understand introduction to the ballast water management system HK, including with videos (HK product introduction video and video walk-through of retrofit 3D scanning).

The current status of the progress of USCG type approval acquisition is that the environmental testing has been completed and the land-based and shipboard testing have been started.

Address <http://www.miuraz.co.jp/en/bwts/>

*1. USCG TA ... The approval of ballast water management systems for the original ballast water treatment regulations defined by the USCG (United States Coast Guard) type approval.
